

KB Boba's Shop

**By Kelly Du and Becca
Brugaletta**

Our Purpose

Our website is designed as a local bubble tea shop. It consists of a menu with different types of drinks, toppings, and sizes. The main purpose was to make an interactive online website to order boba. Our goal was to make a user friendly interface.

Types of Technologies

Throughout our project we used technologies such as:

- css
- html
- php
- JavaScript
- MySql database
- xampp
- docker

Website architecture

Our website is setup like so:

- The menu links to the cart,
- The cart links to checkout,
- Checkout links to confirmation.

Features that worked

Some features consisted of:

- Admin login
- View/Add to cart
- A menu
- Checkout page
- Confirmation page

Features that didn't work?

- We didn't have any features that we included that didn't work.
- One feature we wanted to add but didn't was create an account, this is so that it saves customers' previous orders, could possible make a point system (rewards) and other similar features.

What can be improved in the future if give more time

- Due to the time that we were given we had to change our topic in order to complete the project by the deadline. If we were given more time we would love to create our original project.
- We would like to make the website more in depth rather than as bare as it currently is.

Thank You!
